[1963] [9p. 1 ref. FASEB manuscript no. S 236-2.
Order from OTS or SLA \$1.10 63-19389

Trans. of Sovetskaya Meditsina (USSR) 1962, v. 25
no. 1, p. 145-147.

DESCRIPTORS: *Rheumatic diseases, Therapy.

The recurring forms of rheumatic chorea include recurrences of choreic hyperkinesia resembling the trace reactions that follow an episode of rheumatic chorea. With a pseudorecurrence there are no signs of exacerbation of the rheumatic process. Identification of pseudorecurrences is of theoretical value in understanding the pathogenesis of trace reactions. It is also of practical value because they require special anti-rheumatic treatment. The administration of restoratives, sudatives, and soporifics is recommended for pseudorecurrences of chorea.
